

Nikoloz Kavtaradze

Senior Full-Stack Engineer

+995 592 296 161 | n.kavtaradze94@gmail.com | Tbilisi, Georgia (GMT+4) | [linkedin.com/in/nikoloz-kavtaradze-012139166](https://www.linkedin.com/in/nikoloz-kavtaradze-012139166)

SUMMARY

Senior full-stack engineer with 10+ years of experience building and owning production systems for international, remote-first teams. Backend depth in Ruby on Rails and Node.js, with strong JavaScript and React on the front end, REST API design, and a recent focus on relational schema design, query optimization, and production performance. Works independently, takes features from specification to release, and writes automated tests as part of delivery.

SKILLS

Backend & APIs: Ruby on Rails, Node.js, PHP (Laravel), RESTful API design and implementation

Frontend: JavaScript, TypeScript, React, Next.js, React Native, Redux, Hotwire / Turbo

Data: MySQL, SQL, schema design and query optimization, Firebase, Firestore (NoSQL)

Testing: Capybara, Jest, PHPUnit, unit and functional tests, E2E test pipelines

DevOps & Cloud: Docker, Git, GitLab CI/CD, Google Cloud (Cloud Functions, Cloud Tasks, Cloud Scheduler)

AI Tooling: Claude Code with YouTrack and GitLab MCP integrations

WORK EXPERIENCE

Senior Full-stack Developer · OnTheGoSystems

Jan 2024 – Present

Remote

- Own features end to end on internal translation products built with Ruby on Rails and React (TypeScript), engineering and shipping new functionality from specification to release.
- Diagnose and fix production performance problems: traced a 6 second page load to a status calculator scanning the translation memories table twice, reworked the query, and cut page load roughly 50% verified against real project data.
- Design MySQL schema changes under migration safety constraints, including unique indexes, virtual generated columns, and batched backfill scripts across joined tables.
- Build and maintain E2E test pipelines with Capybara, and instrumented an untimed git clone step to locate the bottleneck in a 130 second merge request flow, then proposed sparse-checkout and cached-repository fixes.
- Handle on-call and operational work, including a critical E2E pipeline outage caused by deleted load balancers.
- Use AI aggressively in daily development, running Claude Code with YouTrack and GitLab (MCP) integrations to speed up feature delivery, code review, and CI/CD work.

Senior Full-stack Developer · Genero

Aug 2022 – Jan 2024

Helsinki, Finland

- Built and shipped backend services in Node.js and TypeScript on Google Cloud, using Cloud Functions, Cloud Tasks, Cloud Scheduler, Firebase, and Firestore.
- Engineered new projects and delivered features for existing products across React and TypeScript, plus WordPress and WooCommerce integrations.

Senior Full-stack Developer · Devolon

Mar 2021 – Aug 2022

Tallinn, Estonia

- Planned and developed new customer projects and reviewed pull requests from other developers.
- Worked across React, React Native, TypeScript, and Laravel.

Full-stack Developer · Idea Design Group

2016 – Mar 2021

Tbilisi, Georgia

- Planned and built new projects while maintaining and updating existing ones, working primarily with React and Laravel.
- Mentored and oversaw junior developers on the team.

Junior Front-end Developer · Idea Design Group

2014 – 2015

Tbilisi, Georgia

- Built front-end markup and UI. Departed for a one-year Erasmus program in Portugal, then returned at the company's request.

EDUCATION

BSc, Software Engineering · Polytechnic Institute of Bragança, Portugal

2015 – 2016

Erasmus exchange under a double-diploma agreement with home university.

BSc, Software Engineering · Black Sea University, Tbilisi, Georgia

2012 – 2015

LANGUAGES

Georgian: Native **English:** Professional working proficiency
